Conclusions and Recommendations

Attendees: Joel Nowak, USFS; Andrea Reither, EFR; Stephen Downs, EFR; Race Fisher, EFR; Todd Eldredge, EFR.

Inspected site to observe progress of revegetation for final bond release. Grading is considered complete. It was too early to see this year's crop of vegetation, looked similar to last year. All parties agreed that another year was needed to determine revegetation success, and a visit at a later date on the calendar was necessary to allow vegetation to recover from winter.
